The pennants displayed with the flags indicate the direction of the wind; red, easterly (from northeast to south); white, westerly (from southwest to north). The pennant above the flag indicates that the wind is expected to blow from the northerly quadrant; below, from the southerly quadrant.

The Hurricane Signal consists of two red flags with black centers, displayed one above the other. It is used to announce the expected approach of tropical hurricanes, and also of those extremely severe and dangerous storms which occasionally move across the great lakes and the Northern Atlantic Coast. The flags are the same as the one now used for the distinctive signal, the pennants being omitted.

The Information Signal consists of a red pennant similar to the direction pennants, and when displayed alone indicates that the local observer has received information from the central office of a storm covering a limited area, dangerous only for vessels about to sail to certain points. The signal is intended to be a notification to shipmasters that valuable information will be given them upon application to the local observer.

By night a red light will indicate easterly winds and a white light above a red light will indicate westerly winds.

LEVI L. WILLCUTT, Pres't
EPH^M C. DAVIS, Treas'r

The only satisfactory and reliable test of a Roofing Material is in its actual wear, after exposure to the elements for a series of years.

Samples of the "BEE HIVE BRAND ROOFING," *in wear for over twenty-five years*, can be seen at the office of the manufacturers, *giving proof positive* of its durability.

For more than a third of a Century, the "BEE HIVE BRAND ROOFING" has been used for covering the most elegant Residences, many Public Buildings, and the finest Stores and Warehouses in Boston and elsewhere.

The year succeeding the great fire of 1872, upwards of *Thirty Acres* of this Roofing was placed upon the new buildings erected in the Burnt District.

The organization established by this Company, for the forwarding of the business in New England and elsewhere, is continued. Reliable, Practical Roofers, using only the GENUINE MATERIAL, are located at all important centres, prepared to execute orders with the greatest promptness and by the most approved methods.

The TURN SHOE SEWING MACHINES of THIS COMPANY are in general use.

THE REECE BUTTON HOLE MACHINE CO.

—MANUFACTURERS OF—

BUTTON HOLE MACHINERY

THE REECE BUTTON HOLE MACHINE

For Cutting and Working Button Holes in Boots and Shoes, Clothing, or any fabric requiring a Worked Button Hole.

On Boots and Shoes it procures a saving of from 20 to 40 cents per case. A single operator can cut and make from 4500 to 5000 button holes per day.

On Clothing its capacity is twice that of any other button hole machine, and as this is the only machine which makes an eyelet button hole without necessitating the folding and turning of the garment at each button hole, this in connection with the automatic cutter makes it a far superior machine for this class of work.

The Reece Button Hole Finishing Machine

Saves from 40 to 50 cents a case. Capacity is from 15 to 18 cases per day. Its work is far superior to that done by hand.

This machine collects the thrum ends and stay cord, and stitches them to the inside of button hole pieces, without showing through on the right side, and without folding the work, thereby avoiding any marking or creasing.

The Reece Button Hole Barring Machine

Saves from 20 to 30 cents per case on barred button holes. Its capacity is from 10 to 15 cases per day.

This is the only machine in the market that makes a perfect hand bar, and for uniformity and strength it far surpasses hand work.

For Switchboard, Railway and Motor use, we make all sizes of Standard and Flexible Wire and Cable with Clark's Insulation.

The rubber used in insulating our wires and cables is specially chemically prepared, and is guaranteed to be waterproof, and will not deteriorate, oxidize, or crack, and will remain flexible in extreme cold weather, and not affected by heat. The insulation is protected from mechanical injury by one or more braids, and the whole slicked with Clark's Patent Compound, which resists water, oil or acid, and is to a very great extent fireproof.

OUR INSULATION WILL PROVE DURABLE WHEN ALL OTHERS FAIL.

Prices will be given upon application.
